Monovalent vaccines have been deauthorized and are no longer administered. Individuals 65+ may receive a second bivalent booster four months after their last shot.

Immunocompromised individuals may receive a second bivalent booster at least two months after their last shot and may receive additional doses at the discretion of their healthcare provider.

Most unvaccinated individuals may receive a single dose of a bivalent vaccine to complete their primary series, rather than receiving multiple monovalent doses.

Individuals who have received one or more doses of a monovalent COVID 19 vaccine: A single dose of mRNA vaccine, bivalent is administered at least two months after any monovalent COVID-19 vaccine.
